

High Volume Combination Tanker (HVC)

Drain Control has recently added to their impressive fleet by purchasing the latest Whale Combination High Volume High Pressure Water Jet Unit and Vacuum Tanker.

This unit offers the client reduced costs and time on site due to the flexibility to carry out a full drain clean and de-scale of any size drain from 100mm to 2500mm and up to 200 meters in length.

The debris and silt can be sucked up while the de-scale is taking place and stored in the 2000 gallon tank to be safely disposed of at a licensed site.

In addition the tanker is fitted with a gully cleaning arm to clean any size gully of debris and refill it with fresh water in one operation. Loading and discharging of any waste is made easy by the 6 inch inlet and outlet vacuum exhausts and a vertical lift of up to 40 meters.

A combination of the best machine available and highly trained engineers ensure that Drain Control Ltd maintain their reputation as the best in the business.

Call 020 8301 4580 now for an emergency call out, a quotation, advice or to arrange a site visit.
